DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13,16 –18,20,32,35,36,38-47 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Examiner finds no null statement as now claimed in the priority document, the originally filed claims or the specification, although as applicant points out, page 5 presents the example, without using an acaricide. Positive statement in “consisting of “ mode is seen as the way to claim the invention, & such language would be considered against the prior art of record. When the new matter is removed, the action will be made final, with re-instatement of the rejection of record, or new references, if amended to require new search.are .
